Portfolios: [Google Skills Profile](#) | [AWS Skill Builder Profile](#)

EDUCATION

Nagarjuna College of Engineering and Technology	Bengaluru, KA
<i>Bachelor of Engineering in Information Science and Engineering</i>	<i>Graduation: 2027 CGPA: 9.03 / 10.0</i>
BGS PU College	Gowribidanur, KA
<i>Pre-University Course (Science - PCMB)</i>	<i>Graduated: 2023 Percentage: 89.66%</i>
Adarsha Vidyalaya	Gowribidanur, KA
<i>Secondary School Leaving Certificate (SSLC)</i>	<i>Graduated: 2020 Score: 621 / 625 (96.33%)</i>

TECHNICAL SKILLS

Languages:	C, Java (Core Concepts), JavaScript
Web & Backend:	React, Flask, Django, HTML5, CSS3
Cloud & Platforms:	Google Cloud Platform (GCP), Amazon Web Services (AWS), ServiceNow
Machine Learning & AI:	TensorFlow, Scikit-Learn, Reinforcement Learning, Clustering, Large Language Models (LLMs), Generative AI
Databases:	SQL, MySQL, Oracle Database, JDBC
Tools & Methods:	Git, GitHub, VS Code, Agile/Scrumban, Enterprise Design Thinking
Core CS Concepts:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Software Testing, Cyber Security Foundations

PROJECTS (Source Code at github.com/PhenixQueen)

AI-Based Student Skill Gap Analyzer and Guider	Python, Scikit-Learn, Flask, React, MySQL
- Developed an intelligent web application to evaluate student academic metrics, pinpoint target skill deficiencies, and suggest personalized career pathways. - Engineered custom clustering algorithms using Scikit-Learn to categorize student performance profiles, driving automated, actionable learning recommendations. - Built a responsive front-end dashboard with React, communicating seamlessly via a Flask-backed RESTful API.	
Crime Prediction and Pre-Action Mechanism	Python, TensorFlow, Machine Learning, SQL
- Designed a predictive analytics pipeline to analyze historical municipal records and model high-risk regional crime hot-spots. - Implemented deep learning and classification frameworks to project pattern shifts, triggering automated warning mechanisms for preemptive community actions. - Optimized data preprocessing pipelines and structured relational databases using SQL to achieve sub-second query performance during high-throughput analysis.	
Metro Station Passenger Control and Safety System	Java, Data Structures & Algorithms, OOP
- Simulated a real-time, high-throughput passenger management system utilizing robust core data structures (Queues, Graphs) to dynamically throttle station congestion. - Applied advanced graph search and pathfinding algorithmic paradigms to determine optimal, safe egress paths during high-occupancy peak transit anomalies.	
IoT-Based Smart Food Dispenser System for Animals	Embedded Systems, Python, Flask, Cloud Integration
- Architected an automated IoT hardware-software prototype capable of tracking real-time weight schedules and dispensing precise food components. - Integrated lightweight webhook alerts to stream real-time dispensing status logs directly to a cloud-hosted web tracking interface.	

CERTIFICATIONS & VERIFIED CREDENTIALS

Cloud & Platform Infrastructure

- **AWS Professional Practice Exam Credentials:** Machine Learning Engineer - Associate (MLA-C01), Solutions Architect - Associate (SAA-C03), Developer - Associate (DVA-C02), CloudOps Engineer - Associate (SOA-C03), AI Practitioner (AIF-C01), Cloud Practitioner (CLF-C02)
- **Google Cloud Credentials:** Google Cloud Engineering Certificate, Associate Cloud Engineer Pathway, AI Essentials Qualification
- **AWS Academy Graduate:** Cloud Foundations (Comprehensive 20-Hour Training Curriculum) & AWS Hackathon Innovation Badge
- **Enterprise Foundations:** Cloud Cyber Security Foundations (Infosys Springboard) & Getting Started with AWS Cloud (Simplilearn)

Artificial Intelligence & Emerging Technologies

- **NXT Wave:** Building Your Own GenAI Model (Certified under guidance of IIT Delhi Alumnus)
- **Outskill & Simplilearn:** AI Mastermind Certification & Large Language Models (LLMs) Foundations
- **Blockchain Technology:** Hedera Blockchain Technology Developer Certification & Great Learning Blockchain Architecture Foundations

Software Engineering, Design & Methodology

- **IBM & NPTEL:** Enterprise Design Thinking Practitioner & Human-Computer Interaction (Elite Certification & Silver Medalist)
- **ServiceNow:** Micro-Certification - Welcome to ServiceNow Ecosystem
- **Agile Methodologies:** Agile Foundations & Scrumban Framework (Simplilearn)
- **Continuous Learning:** Udemy Professional Specialization Core Course Series (Advanced Tracks) & Nestlé Academic E-Learning Program
